

SERGEY KOTLYAROV

DEVELOPER

ABOUT ME

I always try to learn something new and develop myself in areas of interest. Computer graphics, CAD, CorelDraw, 3ds and rarely raster graphics captivated my interest. Currently I am studying Java for Web and Android development. Also I've learnt the basics of HTML and CSS to structure and style webpages. I was learning Unity for a while. Now I'm open for new job opportunities and it'll be great to work for a company where I'll be able to improve my skills and learn some new technologies.
